VERBAL DESCRIPTION:

Multi-chambered ocarina with remnants of 3 spherical  
sandy chambers connected by 2 channels. The figure  
seems to be that of a figure mounted with 3 conical  
supporters (2 of which - which heavily eroded - remain). The  
figure also has 2 broken arm stubs. The chambers  
are arranged so that the smallest lies at the base  
another is just above it & the largest is a fixed  
to the back surface. The rear chamber includes part  
of a flute mouthpiece - which faces forward (orbits of  
this piece is protruding). The lower chamber connects to  
the lower chamber which in turn connects to the upper  
chamber. The lower chamber looks along the original  
cut line. The lower chamber has one sharp edge side  
the legs may be only 2 or rather 4 legs. No parts  
flaps or fig damage.

I have been thinking of you very much lately  
 and wondering how you are getting on.  
 I hope you are well and happy.  
 I have been very busy lately  
 but I will try to write to you more often.
